CAREER SUMMARY

I'm a full-stack developer specialised in frontend and backend development for complex scalable web apps, also a young enthusiast of Computers and Engineering. I've been developing since 2019, am Keen on learning more, expanding my skills and knowledge, collaborating and sharing knowledge with people. Pays obsessive attention to details and prepared to work in a variety of roles as required.

WORK EXPERIENCE

Founder & Developer   UUTMS
3/2021 – 7/2021

Developed A Smart Shuttle Bus Seat Reservation System With Real-time Display of Departure Time, Arrival Time and Distance Between Buses and Bus stops for the University of Uyo Transport Management System (UUTMS).

Achievements:

The App reduces the stress of reserving and paying for a seat in a shuttle bus, and also provides the bus management team with the appropriate information and control they need regarding bus operations, drivers and passengers information. This was Achieved with the use of some of this Technologies:

- Global Positioning System (GPS)
- Google Geo-location API.
- Microsoft Bing Maps Distance Matrix API

Technologies used:

`PHP` `Laravel` `JavaScript` `jQuery` `BootStrap` `HTML/CSS` `MySQL`

Web Developer (Intern)   Retenvo Limited
07/2019 – 12/2019

Retenvo Limited provides professional services which include Website Design and Development, Graphic Design, Mobile Application Development and Software Development. I worked as a Website Designer and Developer under the supervision of the MD/CEO.

Achievements:

At Retenvo Limited I was able to learn professional system and ethics of web development, from a beginner level to a full stack developer.

Technologies used:

`PHP` `Laravel` `JavaScript` `jQuery` `BootStrap` `HTML/CSS` `MySQL`

Web Developer (Remote)   Flux Technology Africa
07/2019 – 11/2019

At Flux Technology Africa, I was a website designer and a WordPress developer. I also worked as a Project manager and team lead on various projects like stop2shop, Nadia Bakery and many others.

Achievements

I achieved/learnt a lot on how to be a team player while at Flux Technology Africa, some of which are:

- Project Management
- Project Presentation
- Business Ideal Proposal and Marketing
- Remote working
- Git & GitHub
- Team Leadership

Technologies used:

`PHP` `Laravel` `JavaScript` `jQuery` `BootStrap` `HTML/CSS` `MySQL`

Computer Engineering   Steve Computer Warehouse
09/2018 – 11/2018

Provided technical support to employee's and customers, was responsible for maintaining customers and the company's computers, this include installing computers, printers, routers and other hardware, updating and repairing existing systems and troubleshooting problems with hardware.

Achievements

- Paying close attention to customer's description of their need
- Training customers on how to use new hardware or software
- Troubleshooting hardware or software problems
